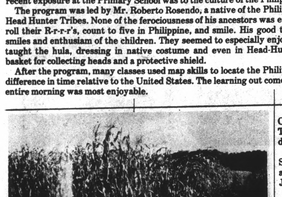
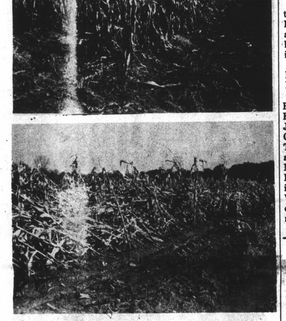
APS STUDENTS ENJOY PHILIPPINE CULTURE

One of the best ways to help children understand other cultures, is through exposure. The most recent exposure at the Primary School was to the culture of the Philippine Islands.

The program was led by Mr. Roberto Rosendo, a native of the Philippines and a descendent of the Head Hunter Tribes. None of the ferociousness of his ancestors was evident as he taught children to roll their R-r-r-s, count to five in Philipine, and smile. His good technique was apparent in the smiles and enthusiam of the children. They seemed to especially enjoy children and teachers being taught the hula, dressing in native costume and even in Head-Hunter regalia, complete with a basket for collecting heads and a protective shield.

After the program, many classes used map skills to locate the Philippines and discuss climate and difference in time relative to the United States. The learning out comes were very beneficial and the entire morning was most enjoyable.





Corn Varieties Make A Difference

What difference does it really make with corn varieties? Research reports provide information about yield, percent erect stalks, days to silk and ear height. J. A. Smith, County Extension Agent, says that there are many growers who still do not plan their corn planting even with all of this information available.

Smith pointed out that there are many factors that affect standability. Some of which are: : variety, date of planting, insects, and disease. He said an early planted variety will generally have a larger root system than a late planted variety.

In the above pictures of an Appomattox cornfield there is a different variety in each picture, planted in the same field, on the same day and fertilized similarly. The difference is variety. The corn on the left will be impossible to harvest by machine; while the corn on the right is in an upright position.

Complete corn variety information data will be available to growers by late December. Smith said if there are growers who want to get their corn seed ordered early, one copy of this information is available for their study at the County Extension Office.

PTA SPONSORS TEA FOR APS FACULTY

American Education Week was a highlight for the faculty at Appomattox Primary School. Celebration included parent volunteers assisting in each classroom so that teachers and aides could enjoy a tea, given in their honor. Parent volunteers (sponsored by the PTA) have an enormous effect on the ability of the Primary School to extend the scope of the curriculum. They work with small groups under a teacher's supervison, serve as tutors on a one-one- basis, and bring to classrooms skills and talents that multiply and extend the teacher's ability to handle the growing wealth of information to be imparted to children. Parent volunteers are a plus for the educational program!

The best gift you can give yourself at Christmas is Fidelity's Christmas Club.
At Christmas, everybody you love is having "visions of sugar plums" of one kind or another. You have yours. "Ma in her kerchief" has hers. Even Mike and Jason have theirs. It's a time for a bit of indulgence. For a lot of us, the best part of Christmas is making someone else's dream come true. Playing Santa Claus. Watching smiles get bigger, eyes get brighter, squeals get louder. To be able to do this "all through the house" takes a lot of money and a lot of planning.
The way to wrap up all your Christmas morning money worries well in advance is with Fidelity's Christmas Club. Like the real Santa, you simply plan ahead. Put a little money every week for fifty weeks in the Christmas Club and Fidelity will add five percent interest on your paid up Club as their Christmas gift to you. It's the best way to insure "a merry Christmas to all." Especially yourself.
